## Nano Engine Protect & Seal (NEPS)

Nano Engine Protect & Seal

### Product Information

Produktinformation

#### Product Properties:

DIATEC Nano Engine Protect & Seal creates a highly active nano barrier in the oil which protects all the internal surfaces of engines and equipment such as oil system, manual gearboxes and differentials. Seals, o-rings and shaft seals are kept supple. Improved oil flow during cold start, smoother and quieter engine running, improved performance, extended life of equipment, and excellent "run dry" emergency properties.

#### Application Area

Service product for use in the oil system of 4-stroke petrol and diesel engines. Applicable for common rail as well as pump injector fuel systems and recommended for engines with turbo charger, catalytic converter and DPF filters. Compatible with all engine oils.

#### Application

Add to oil system after each oil change. We recommend cleaning the oil system with DIATEC Engine Cleaner before use. Observe the maximum oil quantity! In power-steering systems, manual transmissions und differentials use at ratio 1:10.

#### Consumption

300ml sufficient for 5 liters of oil. Mixing ratio: 1:15.

#### Reaction time

while engine is running

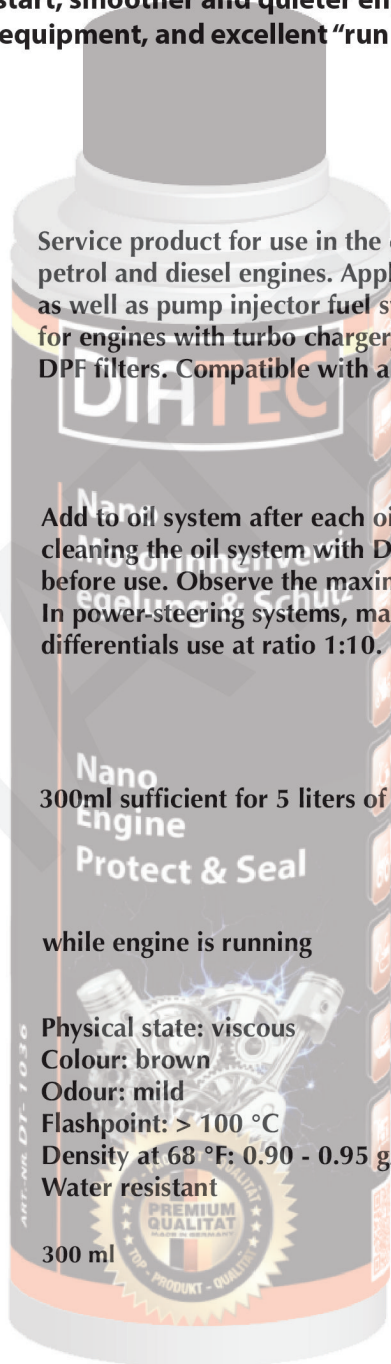

#### Technical data

Physical state: viscous  
Colour: brown  
Odour: mild  
Flashpoint: > 100 °C  
Density at 68 °F: 0.90 - 0.95 g/cm<sup>3</sup>  
Water resistant

#### Available size

1L 5L 10L 25L 200L
